### 1. Source code

1.1	Structure .....	
1.1.1	Mockingbird Engine .....	2
1.1.2	Gauntlet Client .....	2
1.1.3	Unit Testing .....	2
1.2	Engine.{c,h} .....	
1.3	Object.{c,h} .....	
1.4	Node.{c,h} .....	
1.5	Camera.{c,h} .....	
1.6	Mesh.{c,h} .....	
1.6.1	Vertex.{c,h} .....	
1.6.2	Texture.{c,h} .....	
1.6.3	Material.{c,h} .....	
1.7	Light.{c,h} .....	
1.8	List.{c,h} .....	
1.9	OvoReader.{c,h} .....	

### 2. User manual

2.1	Compiling on Linux .....	
2.2	Compiling on Windows .....	
2.3	Demo .....	
2.4	In-App command list .....	

### 3. Engine logic

3.1	Tree structure .....	
3.2	Rendering logic .....	
3.2	Inverse scene render .....	

### 4. Client App logic

4.1	Scene .....	
4.2	Camera management .....	
4.3	Finger movement .....	
4.4	Light movement .....	

### 5. Testing

5.1	Google Tests .....	
5.1.1	Dependencies .....	
5.1.2	Usage .....	

### 6. Dependencies

6.1	Linux .....	
6.2	Windows .....	

### 7. Conclusions

# 1 Source code

## 1.1 Structure

The project is divided in 3 main components: Engine (Dynamic library), Client (Executable), Testing Unit.

### 1.1.1 Mockingbird Engine

The engine is implemented through a dynamic library,

### 1.1.2 Gauntlet Client

### 1.1.3 Unit Testing
